## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art searched and cited failed to teach or fairly suggest a lithographic projection apparatus, having comprising a channel barrier near the source configured to prevent material emanating from the source from propagating along an optical axis, the channel barrier comprising a center and a number of elongated channel members each having a width direction transverse to the optical axis and a length direction extending generally in the direction of the optical axis, wherein the channel barrier is rotatable around the optical axis, the lithographic projection apparatus further comprising a drive connected to the channel barrier configured to rotate the channel barrier around the optical axis in combination with the remaining elements of claim 1. Claims 2-13 are allowable because of their dependencies upon claim 1.
3. The prior art searched and cited failed to also teach or fairly suggest a channel barrier for use in a lithographic projection apparatus, wherein the channel barrier is configured to be rotatable around the optical axis, the channel barrier

further comprising a drive connected to the channel barrier configured to rotate the channel barrier around the optical axis in combination with the remaining elements of claim 14. The prior art searched and cited failed to teach or fairly suggest a method of manufacturing an integrated structure by a lithographic process, the method having a step of providing a channel barrier near the source to prevent material emanating from the source from propagating along an optical axis, the channel barrier comprising a center and a number of elongated channel members each having a width direction transverse to the optical axis and a length direction extending generally in the direction of the optical axis; and rotating the channel barrier around the optical axis in combination with the remaining elements of claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 6,576,912 (Visser et al), 6,683,936 (Jonkers) ,

US Publications 2003/0146391 (Kleinschmidt et al), 2004/0165171 (Tran et al), 2004/0141165 (Zukavishvili et al), 2004/0094724 (Schuurmans et al), 2002/0084428 (Visser et al), WIPO Publication WO 01/79936 (Del Puerto). All of the cited references contain art similar to that being claimed by applicant, more specifically, lithographic methods and apparatuses.
